

INTEGRACIJA OD – DO
D.O.O.

Integracija od-do

Company profile

Company profile

Integracija od-do is a fast growing company founded in 2009 by a team of IT professionals with the goal of becoming the leading enterprise system integration provider in the region. Located in Zagreb, Croatia, Integracija od-do offers system integration services and solutions, consulting, project management and training services, in the area of Enterprise Application Integration, Service Oriented Architecture and Business Process Management, using primarily solutions by TIBCO Software Inc., as well as other Independent Software Vendors' (ISV) products and open source platforms such as Mule™ ESB.

Our main areas of expertise are:

- Application and system integration using TIBCO platform;
- Enterprise Service Bus (ESB) solutions;
- Provisioning and order fulfillment solutions;
- Service Oriented Architecture consulting, implementation and trainings;
- Business Process Management consulting, implementation and trainings;
- Project management and change management services, implementation and trainings;
- Telecommunications business consulting, analysis and process optimization.

With our team's extensive know-how and experience from numerous projects in telecommunications and other industries, Integracija od-do is focused on providing top-quality services and solutions with high additional value, taking into account various excellence indicators. In this way, Integracija od-do is able to contribute to, and assure projects' success, fast business benefits, as well as solutions' and process improvements' acceptance in a company undergoing change, when introducing new solutions, processes and IT systems.

To be prepared for requests, challenges and customers' needs of various kinds, but also to achieve business excellence and stability, Integracija od-do pays special attention to best practices such as knowledge management, professional development and improvement of its employees, specialist and general education, international standards and certification, quality assurance and project management, environmental protection and sustainability.

Partnerships

Integracija od-do is TIBCO Software Inc. regional consulting partner for Croatia, Slovenia, Serbia, Bosnia and Herzegovina, Macedonia, and Kosovo.

Headquartered in Palo Alto, California, TIBCO Software Inc. (NASDAQ:TIBX) provides enterprise software that helps companies achieve business process automation and costs optimization. With

over 4,000 customers and offices in 40 countries, TIBCO has given leading organizations around the world better awareness and agility – what TIBCO calls The Power of Now®.

Since the launch of TIBCO BusinessWorks in 2001, TIBCO has continued to extend the capabilities of the messaging platform with:

- Business Process Management (TIBCO ActiveMatrix BPM);
- Master Data Management (TIBCO Collaborative Information Manager);
- Complex Event Processing (TIBCO BusinessEvents);
- Mobile Internet and Service Provider solution frameworks, including centralized product catalogues (TIBCO Advanced Fulfillment Suite);
- Analytical Reporting (TIBCO Spotfire);
- Data Mining (TIBCO Insightful);
- Event Monitoring (TIBCO Syndera).

TIBCO is the successor to a portion of the business of Teknekron Software Systems, Inc. Teknekron was founded in 1985 by Vivek Ranadivé and developed software, known as The Information Bus™ (TIB), for the integration and delivery of market data – such as stock quotes, news and other financial information – in trading rooms of large banks and financial services institutions. In 1994 Teknekron was acquired by Reuters Group PLC, which continued the development of TIB software and expanded its use in the financial services markets

In January 1997 TIBCO Software Inc. was established as a separate entity to create and market software solutions for use in the integration of business information, processes and applications outside the financial services sector. In July 1999 TIBCO went public on the Nasdaq Stock Market under the ticker symbol TIBX, and since that time TIBCO has been established itself as the leading independent provider of business integration software.

TIBCO is focused on leveraging and extending the capabilities of its software to help companies move toward predictive business: an exciting new way of doing business that lets companies anticipate customer needs, create opportunities and avoid potential problems. As the basis of the real-time movement of data across the enterprise, TIBCO's software is uniquely capable of correlating information about a company's operations and performance with information about expected behavior and business rules so they can anticipate and respond to threats and opportunities before they occur.
